#### **Préambule**

Bilan floristique

- Travaux phytosociologiques :
  - 103 relevés (2017)
  - 3 systèmes / 8 habitats (niveau 5)
  - Toposéquence
  - Typologie de la végétation et des habitats de Tromelin

### Cartographie des systèmes de végétation

- Processus de segmentation :
  - Image THR PLEIADE (20160530)
  - Segmentation C1 = env. 700 polygones
- Phase de terrain
  - Janvier mars 2018
  - Gabrielle Dicque et Jean Hivert
  - Datas : substrat, relief (géomorphologie)
  - Méthode inspirée de Marriner et al. 2010 \*
  - Vérification des polygones C1 & prise de points GPS (env. 800)
- Exploitation des données :
  - Points de référence : relevés phytosociologiques, PP, collections végétales, taxons patrimoniaux, EEE...
  - ⇒ Carte de la géomorphologie et des systèmes de végétation de Tromelin + typologie

### Plages / Secteurs anthropisés et perturbés
